

PACLINE's Enclosed Track Heavy Weight

PAC-MAX™

Load it up!

Product A
Single Pendant - 75 lbs

NEW PAC-MAX™ by PACLINE
High capacity enclosed track
Single Pendant - **200 lbs**

Product B
Single Pendant - 125 lbs

DARE TO COMPARE

Pacline's new PAC-MAX™ hauls loads like no other.

	Max load per pendant	Max drive pull	Chain breaking load
Product A	75 lbs.	750 lbs.	7,000 lbs.
PAC-MAX™	200 lbs.	2000 lbs.	15,000 lbs.
Product B	125 lbs.	750 lbs.	10,000 lbs.

PACLINE's PAC-MAX™ is a high capacity, enclosed track chain conveyor designed for stability in conveying heavy loads; up to 200 lbs. from a single pendant. This conveyor has a unique cross shaped track section that allows for "slot up" (inverted), "slot sideways" (side-loaded) or "slot down" applications.

In the inverted (slot up) position, the **PACLINE PAC-MAX™** outperforms the typical spindle conveyors, in many ways:

- Much higher load carrying capacity.
- Capability to incline and decline at up to 45 degrees.
- Each drive can pull up to 1,000 feet of chain.
- The conveyor chain is protected from contaminants due to its enclosed track design.
