

HYTROL

RIGHT-ANGLE SORTATION

Space-Saving Sortation Solution

Achieve versatility with Hytrol's MRT and SRT. With pneumatic roller transfers, space-saving, right-angle sortation is made effortless.

www.hytrol.com

The ProSort MRT is a sorter for medium-sized items. Product is transported on multiple narrow belts. Rollers pop up between the belts to transfer items at right angles to the sorter.

The ProSort SRT is designed with multiple narrow belts to transport items and is equipped with right-angle pop-up rollers. The rollers pop up between the belts to transfer items off the unit. The conveyor is designed to handle and transfer small to medium-size items such as boxes, cartons, totes, etc.

Features

- Right Angle Transfer
- Two-Sided Transfer
- High Sort Rates
- Close Transfer Locations
- Flexible Sort Locations
- HyPower Distributed Cabling System
