

## *ProLogic...* An evolution in 24-volt technology

*ProLogic* is the solution when you are looking for a multi-function conveyor system without the high cost of a PLC or hours and hours of labor installing additional components and wiring.

*ProLogic* has complete traffic control, all pre-wired bed sections, programmed and ready to go!

### User Interface:

1. Upstream/Downstream Communication Cable Jack
2. Communication State LEDs
3. Card Status LED
4. DC Power Input/Output Connector
5. Control Function Output
6. Photo Eye Sensor Connector
7. Powered or Non-Powered Aux Output Control
8. Powered or Non-Powered Aux Input Control

## What sets us apart from the competition?

Do you find yourself intimidated when your customer asks for Zero Pressure Accumulation? Are you missing out on opportunities because of the complexity of the system?

*What's an IOP and how many do I need? How many Aux I/O modules will I need? Who is going to do all this mounting and wiring? Where am I going to find a programmer?*

**Atlantis Technologies LLC (patent pending) ProLogic Accumulation module takes all the worries out of Zero Pressure.**

All bed sections come completely pre-wired, pre-programmed and ready to plug and play. No proprietary additional devices or modules required. Just install the conveyor, give it power and let **ProLogic** do the rest. Call us now for more information.
